

Watt-Flex® Maximum Operating Temperature

Dalton Electric **Watt-Flex®** Split Sheath Heaters can operate at continuous temperatures up to 900°C (1652°F). Customers have exceeded this maximum temperature limit under special design and operating conditions.

Our ability to custom design our heaters for your unique application and conditions ensure maximum temperature is achieved while delivering maximum heater life and finished part throughput. Please consult our Dalton technical team to see how we help companies like yours heat beyond the competition.

Call us today (978) 356-9844 for more information on Dalton Electric **Watt-Flex®** heaters. We welcome the opportunity to help your operation reduce the total cost of heating.

Dalton Electric Process heat precisely delivered.
