

## Ceramic Bead - High Temperature Lead Wire Protection

Nesting fish spine ceramic beads are concave on one end and convex on the other. When ceramic ball and socket fish spine beads are strung convex to concave, the wire can flex, twist or bend and still maintain the ceramic insulation. The beads can safely protect lead wire exposed to temperatures up to 1850°F, or vacuum or in bare wire installations.

See below for the appropriate bead size for each wire gauge.

High Temperature Ceramic Bead Parts Table						
Part ID	Reference ID	OD	ID	LENGTH	Bead/Ft	Wire AWG
P-878	CB-200092	0.200	0.092	0.200	70	22 - 20
P-879	CB-260116	0.260	0.116	0.260	54	18
P-880	CB-260156	0.260	0.156	0.260	54	16 - 12
P-883	CB-400180	0.400	0.180	0.400	34	12 - 10

Call us today (978) 356-9844 for more information on Dalton Electric **Watt-Flex**® heaters. We welcome the opportunity to reduce the total cost of heating of your operation.

**Dalton Electric Process heat precisely delivered.**
